Profile

Backend Developer specialized in building and enhancing **scalable server-side applications** using **PHP** and **Laravel Framework** and **Wordpress**. Experienced in developing **RESTful APIs**, **database design (MySQL, Eloquent ORM)**, and **system integrations** with a strong focus on **performance**, **clean code**, and **security best practices**. Skilled in **MVC architecture**, **OOP**, and **API development**. Adept at collaborating within **Agile teams**, **debugging**, and delivering **maintainable backend solutions**. Additionally, familiar with **frontend development** using **Angular** for seamless **full-stack integration**.

Education

Bachelor of Computers and Information (Information Systems Major) 09/2019 – 07/2023
Assiut University – Assiut, Egypt **Education – Graduation Certificate** [↗](#)

Professional Experience

PHP / Laravel & WordPress Back-End Developer – X bees 12/2025 – Present

- Developed and maintained back-end applications using **PHP** and **Laravel**
- Built and maintained WordPress projects
- Built and consumed **RESTful APIs**
- Worked with **MySQL databases** and optimized complex queries
- Improved application performance and fixed bugs
- Integrated back-end services with front-end components
- Used **Git** for version control and team collaboration

ITI (Information Technology Institute) – Assiut Branch - Intern 07/2025 – 11/2025
Completed The Full Stack Web Development (PHP/Laravel & Angular)
– Intensive Code Camp **ITI Certificate** [↗](#)

Skills

- **Backend** : PHP (Core & Advanced), Laravel, Node.js, RESTful APIs, WordPress (CMS)
- **Database** : MySQL, Database Design, Query Optimization, Eloquent ORM, Migrations & Seeders
- **Frontend** : HTML5, CSS3, JavaScript (ES6+), TypeScript, Angular (Components, Services, RxJS), Bootstrap, jQuery, Responsive Design
- **Tools** : Git, Docker, Apache Web Server, Linux (Ubuntu), Postman, XAMPP
- **Other** : Unit Testing, UX/UI Principles, Network & Cyber Security, Red Hat SysAdmin 1, OS Fundamentals

AI Skills

Prompt Engineering Certificate Link ↗	Claude Code & OpenCode (Terminal)
AI Agents & Multi-Agent Workflows	AI Models & Providers (including Chinese models)
AI-Assisted Code Review & Debugging	AI-Assisted Planning & Refactoring

Projects

Eshlf - A logistics platform for freight transportation and related services. 05/2026 – Present

Technologies: PHP, Laravel, MySQL, RESTful APIs, JWT Authentication

Description:

- Developed the admin dashboard and CMS for a logistics and freight transportation platform using Laravel and Filament.
- Built a fully customizable website content system using the Mason plugin, giving admins complete control over website pages and content.
- Implemented advanced media and image management using the Curator plugin for efficient image handling and optimization.
- Currently developing backend modules for real-time chat, notifications, OTP-based security, and role & permission management for admins and company staff.
- Contributing to core logistics workflows, including secure transportation operations and communication between shippers and clients.

Under development

AqarGate – Real Estate Web Platforme - production

12/2025 – 02/2026

Technology: wordpress, PHP (Native), MySQL, HTML, CSS, JavaScript

Description:

- Developed and customized the website using WordPress, PHP Native, and a custom Child Theme based on the Houzez Parent Theme.
- Integration with Nafath.sa and Rega.sa APIs for identity verification and real estate regulatory compliance.
- Improved database performance, reducing key request response times from ~16s to ~2s.
- Updated the Houzez Parent Theme and ensured full compatibility with the custom Child Theme.
- Fixed issues related to property management and REGA data retrieval and synchronization.
- Implemented bulk property synchronization with REGA and centralized API logging for REGA and Nafath integrations to monitor requests, track errors, and simplify troubleshooting.

Project: “altuwayjiri plateforme” – PHP Native Web Application

03/2026 – 04/2026

Technologies: Wordpress, MySQL, HTML, CSS, JavaScript

Description:

- Developed and customized a WordPress e-commerce website using a Parent Theme and WPBakery Page Builder.
- Customized website layouts and functionality to meet the project's business and e-commerce requirements.
- Configured and integrated the required WordPress plugins to deliver a complete and functional online store and Managed plugin configuration.
- Managed responsive UI adjustments across the website.
